

OUR COMMITMENT TO THE ENVIRONMENT

Protecting and preserving the environment is a core value of PABCO® Roofing Products. Recognizing these values, we have developed multiple programs and initiatives to address energy efficiency, recycling, and other practices that reduce waste and support sustainable practices.

PABCO® Roofing Products

Recommended by professionals.

GREEN BUILDING PRACTICES

More and more homeowners, builders, municipalities, and government agencies are embracing green standards for their construction projects to help preserve our environment. PABCO® Roofing Products can help by providing products that contribute to green certifications, such as LEED (Leadership in Energy and Environmental Design).

LEED certified buildings are not only good for the planet, but can also help occupants save money through reduced energy and water bills. Within the LEED Rating Systems for the various types of construction, there are multiple opportunities for shingles from PABCO® Roofing Products to contribute to LEED rating points. Among these opportunities are the Heat Island factor when using of our Premier Radiance® Elite or Premier Radiance® highly reflective shingles, by consideration of the LEED preference for Regional Materials, or by factoring our recycled content into the recycled content of the whole building.

LEED locally available materials.

WASTE REDUCTION INITIATIVES

PABCO® annually diverts over 30,000 tons of waste products from landfills to be reused or recycled.

- Asphalt process waste is recycled for use in local road construction.
- Over 98% of water used during production is collected and reused.
- Empty pallets are collected from our distributors, refurbished by a local pallet recycler, and reused. Pallets can be refurbished and reused many times over.
- All excess granules and sand are collected, sorted, and reused in our manufacturing process.
- Recycled materials are utilized in manufacturing, when available.
- Waste limestone is sourced for use as a raw material.
- PABCO® has a comprehensive recycling program that includes:
 - Process waste
 - Cardboard
 - Scrap metal
 - Waste oil
 - Plastic
 - Paper
 - Office waste

PRODUCT	RECYCLED CONTENT (POST-INDUSTRIAL)
